

ZURICH®

# Fire Marshals & Wardens Training

## Product summary

### Background

An effective fire prevention approach is required to identify positive and negative risks, assess their effect and decide on the most appropriate course of action. The successful implementation of the corporate fire prevention strategy at all levels of the organisation is vital to meet current legislative requirements. To deliver this, employees need to have a basic awareness of fire safety/prevention issues.

### Summary

This facilitated interactive discussion between the consultant and delegates involves practical and theoretical content and examples. On completion of the course, delegates will be able to take their practical experience back to the workplace and use it within their own areas of responsibility.

Training methods include the use of discussion techniques and exercises to explain the key tasks in fire prevention. The product offers customers an introductory understanding for fire marshals and wardens to meet their increased responsibilities within the Regulatory Reform (Fire Safety) Order 2005 and to help them monitor and develop a consistent approach to the reduction of potential fire risks within the workplace.

### Objectives

The training covers:

- An introduction to fire safety awareness
- What is fire, the fire triangle and potential causes
- Chemistry of fire
- Legislation, including:
  - Regulatory Reform (Fire Safety) Order 2005
  - Health & Safety at Work Act 1974
  - The Management of Health & Safety at Work Regulations 1999
- The process of fire risk assessment
- Fire procedures and the development of fire emergency procedures
- Evacuations and drills
- Fire safety signage
- Portable fire fighting equipment
- Training video – the effects of fires
- Fire prevention – the process of reducing risks
- Human behaviour
- Means of escape.

#### Duration

Half-day.

#### Provider

A fully trained and experienced Zurich Risk Management Consultant.

#### Format

Training course.

## Features

- The course is based around a half-day training session for up to 20 delegates with either one half-day session per day or two half-day sessions on the same day at a reduced fee
- The product stands alone but can also be linked to other health and safety departmental training products
- Each delegate will be provided with a CD-ROM or hard copy containing the course slides and notes.

## Benefits

- Provides awareness of fire safety as a concept
- Gives knowledge of current legislation
- Provides the ability to identify and develop procedures to further reduce fire risks in the workplace
- Provides an understanding of the key responsibilities
- Provides the ability to understand basic risk assessment techniques
- Provides the ability to identify fire prevention techniques
- Evaluates human behaviour in the context of an emergency situation
- Helps the organisation introduce improved preventive loss reduction measures.

## Where this would be useful

All employers have a duty of care to their employees, visitors and members of the public on their premises. This training will enable them to exercise that duty.

## Who is it aimed at?

All managers and staff appointed as fire wardens and marshals.
